

I would like for telemarketing to be stopped at my home. We are almost always rudely interrupted during dinner with an "out of the area" call which usually doesn't have a person on the other end (computer generated). Worse yet is to be awakened by the same thing. We pay a lot of money for phone service and feel violated by not being able to stop these unwanted calls. Illinois does not have a no call list. Maybe you can help at the federal level?
